

Davidson Course Compass – Fall 2025

■ What Is It?

Davidson Course Compass is a custom■built AI assistant designed to help students efficiently build accurate, conflict■free four■course schedules for the Fall 2025 semester. It assists in meeting Davidson's curriculum requirements, Ways of Knowing (WoK) distributions, and personal scheduling preferences.

- Exploring course options across majors and minors
- Checking for prerequisite chains and registration restrictions
- Preventing time conflicts and credit overloads
- Evaluating instructor ratings (via RateMyProfessor data integration)

■ Sources of Training Data

- Davidson Fall 2025 Course Catalog (Official PDF)
- WebTree 2.0 Flowchart (Course selection logic)
- RateMyProfessor Instructor Ratings (Provided for additional context)
- Real■time Student Inputs (Via conversational prompts)
- Note: This version is exclusively for the Fall 2025 semester. Data updates are not live; check the registrar for last■minute schedule changes.

■■ Important Notices

About Generative AI

- This tool uses AI■powered language processing to provide course suggestions and registration guidance. While it applies strict rules and data filters, it may occasionally produce inaccurate or incomplete information ("hallucinations").
- Always cross■check schedules against official registrar resources.
- This is an advisory tool, not a registration system. Final course selection must be made through official Davidson platforms.

About RateMyProfessor Data

- Davidson Course Compass includes instructor ratings from RateMyProfessor to assist in evaluating teaching styles and course experiences.
- Disclaimer: These ratings are based on small sample sizes and may reflect the views of a self■selecting group of students.
- They should be used as one factor among many when making course decisions, not as the sole deciding metric.
